Dombivli, Maharashtra | +91-7021341948 | tanishjain020205@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Engineer and Full-Stack Developer specializing in scalable web systems, autonomous backend pipelines and deterministic AI architectures. Proficient in Flask, Python, React, Node.js, MongoDB and PostgreSQL, with proven experience building distributed ingestion engines, resilient APIs and 500+ automated test gates. Recognized as a national hackathon finalist among 320+ competing engineering teams.

EDUCATION

Vivekanand Education Society's Institute of Technology (VESIT), Mumbai | 2023 – Expected 2027

B.E. in Automation & Robotics Engineering | CGPA: 7.43 / 10

Relevant Coursework: Data Structures & Algorithms, DBMS, Machine Learning, Generative AI

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST API Design

Databases: MongoDB, Firestore, PostgreSQL

Auth & Security: Firebase Authentication, RBAC, Protected Routes, JWT, Row-Level Security

Testing & DevOps: Git, GitHub, Postman, Jest, Playwright, Vercel, Render, Hypothesis, Pytest

AI Integration: Gemini AI API, Prompt Engineering, Structured JSON Schemas

PROJECTS

Job Hunter - Autonomous Multi-Tenant ATS Ingestion & Verification Engine | 2026

Python, Flask, Supabase (PostgreSQL), GitHub Actions, Hypothesis, Multi-LLM Orchestration | [Live](#) | [Source](#)

- Ingested career boards across **94+ tech companies**, building a sub-millisecond regex filter that discards 98% of irrelevant postings to eliminate token waste.
- Designed a self-healing LLM cascade with token-bucket rate limiting, multi-key rotation and automated provider failover.
- Built a zero-trust backend using Supabase PostgreSQL Row-Level Security, JWT authentication and property-based fuzz tests.

Department Ledger Portal - Academic Record System | 2025

Next.js, React, Firebase Admin, Firestore, Gemini AI API | [Live](#) | [Source](#)

- Built a full-stack system validated by **77 unit tests and 5 E2E tests**, ensuring reliability before deployment.
- Developed an AI-driven document parser with rate limiting, preventing API quota exhaustion under load.
- Implemented role-based access control and audit logging, enforcing data integrity across protected workflows.

Edvanta - AI-Powered Educational Platform | 2025

Python, Flask, React.js, Gemini AI API, MongoDB, Firebase | [Live](#) | [Source](#)

- Architected **33 REST API endpoints** across three core modules (AI tutoring, quizzes, learning roadmaps), enabling a single backend to power all student-facing features.
- Designed structured JSON schemas for AI integration, ensuring consistent, application-ready outputs without manual post-processing.
- Secured client-server workflows with authentication and protected routes, preventing unauthorized API access.

DineEase - Restaurant Menu & Order Management System | 2024

React.js, Node.js, Express.js, MongoDB | [Live](#) | [Source](#)

- Built **14 REST API** endpoints using modular controllers and centralized middleware for a scalable codebase.
- Solved cart-state persistence by syncing browser storage with the database, eliminating data loss across sessions.
- Implemented atomic order lifecycle transitions (Created -> Preparing -> Ready -> Served) with optimistic client locks to prevent race conditions.

ACHIEVEMENTS & LEADERSHIP

- **National Finalist** - Selected from **320+ competing teams** at Hack Celestial 2.0 for building Edvanta.
- **Hackathon Co-Organizer** - Led operations for UniMerge 1.0, a national hackathon with **130+ participants**.
